

APPENDIX TO THE DATA SHEET: VARIO SYSTEM

CLAMP BRACKET FOR P 261-AMT + TRIPOD MOUNT VARIO SYSTEM

The **Pan Vario System** from the **Pan Accessories series** is a mounting system for mobile use and flexible mounting.

The system can be mounted without tools on a loudspeaker, e.g. the P 261-AMT | Cine or the P 261-AMT | Event. The clamp bracket engages in the corresponding slots of the speaker and holds it securely. The clamping mechanism is firmly fixed by two locking bolts on the clamp bracket. The L-shaped tripod mount is attached to the clamp bracket via the mounting block on the back by means of two ball locking bolts. The tripod mount can be vertically tilted by means of a toothed clamping element.
