HORIZONTALLY ROTATABLE WALL MOUNT (TWM IV) WMP SET FOR P / PB XXX LOUDSPEAKER SYSTEMS

The **horizontally rotatable wall mount (TWM IV) WMP SET for P / PB xxx loudspeaker systems** from the **Pan Accessories series** can be used to accommodate the P / PB xxx models of the **Pan Beam and Pan AMT loudspeaker system range**.

The accessory is made of galvanised steel and can be powder-coated to match the colour scheme of the loudspeaker. The wall mount is designed for secure mounting of the loudspeakers to wall surfaces and consists of parts for easy installation. In addition, the wall mount can only be dismantled using tools.

The wall mount can be moved freely over the length of the loudspeaker via the included slot nut to be mounted in the rear slots of the loudspeaker. This permits to flexibly adjust the height of the loudspeaker.

The wall mount provides a horizontal speaker swivel range of $\pm 45^\circ$. It also provides a vertical swivel range of $+5^\circ / -20^\circ$.

EQUIPMENT / OPTIONS

See last page for explanation of the symbols.

APPLICATIONS

Wall mounting
