#Release 04.2021

The preset file are available for:

- Duecanali Series with DSP/Dante
- Quattrocanali Series with DSP/Dante
- Ottocanali Series with DSP/Dante
- Mezzo Series // special DSP Settings

The current Powersoft Software – Armonía Plus Version 2.0.1 rev. 140 is supported

At first store the unzipped files into the library folder of the Armonía Software. The folder is placed:

\Users\Public\Documents\Powersoft\ArmoniaPlus\SpeakersLibrary

To load a preset, use the “speaker configuration” in the software to select and load a speaker preset into the Amp.

Following speaker models are supported:
